Mart

A stylized diagram of the solar system. On the left, a large, vibrant Sun is depicted with a red-orange gradient and jagged, flame-like edges. To the right of the Sun, two concentric black circles represent the orbits of planets. A horizontal blue line bisects the diagram, passing through the Sun and the orbits. The background is a solid light blue. The word "Sol" is written in a black, cursive font within a light blue rectangular box that is centered between the two orbits.
